In re application of: Mohit et al.

Application No. 09/881,353

Filed: June 12, 2001

Confirmation No. 8754

For: SYSTEMS AND METHODS FOR AUTOMATIC IDENTIFICATION AND
HYPERLINKING OF WORDS OR OTHER DATA ITEMS AND FOR
INFORMATION RETRIEVAL USING HYPERLINKED WORDS OR DATA
ITEMS

Examiner: Paul R. Fisher

Art Unit: 3689

Attorney Reference No. BIZ/01-0003

PROPOSED AGENDA FOR TELEPHONIC INTERVIEW

TIME: 7:30 a.m. PDT / 10:30 a.m. EDT

LOGISTICS: Examiner Fisher to call Lloyd Pollard at (503) 475 - 5155

POINTS FOR DISCUSSION

1. Independent claim 1 is allowable over references currently of record
 - a. As agreed during the July 28, 2010, interview, the collection of Price Watch references does not provide for or suggest annotating a web page.
2. Independent claim 20 recites "creating annotation instructions on the web page"
 - a. Since the Price Watch references do not disclose each and every feature of claim 20, the Price Watch references do not anticipate claim 20.
3. Slightly amending independent claim 22
 - a. "the client computer having executable code for ~~performing one or both of annotation and recognition of~~ annotating key elements on the key list"
4. Slightly amending independent claim 27
 - a. "sending instructions to the consumer computer system for presenting to the user of the consumer computer system one or more ~~hyperlinks~~ hyperlink annotations related to a key element on the electronic document so the user may"
5. Independent claim 33 recites "annotations being in addition to native content in the electronic document"
 - a. Since the Price Watch references do not disclose each and every feature of claim 33, the Price Watch references do not anticipate claim 33.
6. Independent claim 45 recites "annotations being in addition to native content in the electronic document" and other annotation-related features
 - a. Since the Price Watch references do not disclose each and every feature of claim 45, the Price Watch references do not anticipate claim 45.
7. Independent claim 48 recites "annotations being in addition to native content in the electronic document" and other annotation-related features
 - a. Since the Price Watch references do not disclose each and every feature of claim 48, the Price Watch references do not anticipate claim 48.

8. Independent claim 49 recites “annotations being in addition to native content in the electronic document” and other annotation-related features
 - a. Since the Price Watch references do not disclose each and every feature of claim 49, the Price Watch references do not anticipate claim 49.
9. Independent claim 53 recites “an annotation module stored on the client or central computer system for associating identified key elements with an annotation from the key list so that a user presented the electronic page can retrieve information related to the key element by selecting the annotation.”
 - a. Since the Price Watch references do not disclose each and every feature of claim 53, the Price Watch references do not anticipate claim 53.
10. Independent claim 54 recites “the annotation instructions being used by the client computer system to create an annotation for a predetermined key element on the web document, and wherein the annotations are being made in addition to those native to the original document”
 - a. Since the Price Watch references do not disclose each and every feature of claim 54, the Price Watch references do not anticipate claim 54.
11. Independent claim 64 recites “generating annotation instructions for the client computer system to create one or more annotations for one or more key elements in the content document”
 - a. Since the Price Watch references do not disclose each and every feature of claim 64, the Price Watch references do not anticipate claim 64.
12. Independent claim 65 recites “invoking a central computer system in response to receiving data about the identity of the electronic document received on the consumer computer system, to generate instructions for the consumer computer system to present to the user of the consumer computer system one or more hyperlinks related to a key element on the electronic document so the user may retrieve data or information related to the key element”
 - a. Since the Price Watch references do not disclose each and every feature of claim 65, the Price Watch references do not anticipate claim 65.
13. Independent claim 66 recites “(i) the consumer computer system recognizing predetermined key elements on an electronic document and (ii) the consumer computer system annotating the key elements by associating recognized key elements with a URL for a second computer system”
 - a. Since the Price Watch references do not disclose each and every feature of claim 66, the Price Watch references do not anticipate claim 66.
14. Independent claim 67 recites “annotation instructions for the client computer system to associate annotations with key elements on an electronic page recived by the client computer ... wherein the annotations are being made by the client computer system in addition to those native to the original document and wherein the computer code operates to recognize and annotate key elements in the document”
 - a. Since the Price Watch references do not disclose each and every feature of claim 67, the Price Watch references do not anticipate claim 67.
